

**ClearRay**

Customizable
Motorized
Fully Integrated

Presenting the most customizable, feature-rich veterinary x-ray system currently available on the market...

The durable, highly adaptable **Clear Ray System**.

Optional Motorized Height-Adjustment
For variable SID

High-End Materials
Manufactured from high-quality anodized aluminum, the **Clear Ray's** sturdy column can be adjusted to fit low ceilings

Silent
Rubber-cushioned feet reduce noise and minimize vibration, providing better operational quality

Stability
Solid anchor points hold the entire system firmly in place to ensure smoother operation

Available Integrated 12-18" LCD Touchscreen DR System

Fully integrated tablet with available software to operate and manage all your digital imaging needs

Functionality
Our unique omni-directional table design is the most versatile floating table currently on the market, with the greatest lateral range

Light-Weight
By reducing waste present in our competitors' designs, we achieved the lightest over-all design, reducing shipping costs and keeping your budget in mind

Ease-of-Use
Foot controlled, one-touch function for easier animal management and image capture

Made Locally, Supported Locally

Our competitors' products are built—and supported—overseas. That can result in unnecessarily long waits for parts and service.

With the **Clear Ray's** All American design, construction and support, we are always local when you need us!

It's About Saving Time

Every aspect of the new **Clear Ray Veterinary System** was designed by veterinarians with over 25 years of experience.

The easy-to-use **Clear Ray System** takes advantage of new technology to help make doing your job easier, faster and better overall.

Available Options

The **Clear Ray Veterinary System** is unique in the market for its unprecedented customizability, making it highly adaptable to any veterinary environment. These are some of the customization options available with this groundbreaking new system:

- ✓ 12-18" LCD tilting touchscreen mounted to retractable column or stand
- ✓ First-to-market with a motorized adjustable-height tube stand
- ✓ 180° motorized tilting tube stand
- ✓ Customizable table Width & Length dimensions
- ✓ Certified and non-certified LED/LASER collimator
- ✓ Carbon fiber tabletop

Excellent design, superior build quality,
and **ALL-AMERICAN** innovation!
